IMPORT STATISTICS
WILLIAM C. GEORGE

REPORT No. FT 120

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities, which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, metals, such as copper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse withdrawals for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Subgroup descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete subgroup descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a subgroup classification or country name from this report indicates no transactions for that subgroup or country.

"Effective with the statistics for the month of January 1948, United States Imports for Consumption is shown in Report FT 120. The monthly issues of Report FT 120 for 1947 contained information on general imports and the calendar year issue of Report FT 120 contained information on both imports for consumption and general imports."

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information useful to users of foreign trade statistics (changes in type of shipments covered by the current statistics, unusual shipments, problems of valuation, classification, etc.).

A Catalog of Monthly Foreign Trade Statistical Publications listing reports available on a free and paid basis and describing unduplicated information available for reference purposes is available free upon request to the Bureau of the Census.

IMPORT STATISTICS
WILLIAM C. GEORGE

REPORT No. FT 120

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, metals, such as copper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse withdrawals for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Subgroup descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete subgroup descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a subgroup classification or country name from this report indicates no transactions for that subgroup or country.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information useful to users of foreign trade statistics (changes in type of shipments covered by the current statistics, unusual shipments, problems of valuation, classification, etc.).

A Catalog of Monthly Foreign Trade Statistical Publications listing reports available on a free and paid basis and describing unduplicated information available for reference purposes is available free upon request to the Bureau of the Census.

IMPORT STATISTICS
WILLIAM C. GEORGE

REPORT No. FT 120

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, metals, such as copper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse withdrawals for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Subgroup descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete subgroup descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a subgroup classification or country name from this report indicates no transactions for that subgroup or country.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information useful to users of foreign trade statistics (changes in type of shipments covered by the current statistics, unusual shipments, problems of valuation, classification, etc.).

A Catalog of Monthly Foreign Trade Statistical Publications listing reports available on a free and paid basis and describing unduplicated information available for reference purposes is available free upon request to the Bureau of the Census.

IMPORT STATISTICS
WILLIAM C. GEORGE

REPORT No. FT 120

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, metals, such as copper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse withdrawals for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Subgroup descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete subgroup descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a subgroup classification or country name from this report indicates no transactions for that subgroup or country.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes a monthly publication containing information useful to users of foreign trade statistics (changes in type of shipments covered by the current statistics, unusual shipments, problems of valuation, classification, etc.).

A Catalog of Monthly Foreign Trade Statistical Publications listing reports available on a free and paid basis and describing unduplicated information available for reference purposes is available free upon request to the Bureau of the Census.

IMPORT STATISTICS
WILLIAM C. GEORGE

REPORT No. FT 120

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, metals, such as copper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse withdrawals for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Subgroup descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete subgroup descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a subgroup classification or country name from this report indicates no transactions for that subgroup or country.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes a monthly publication containing information useful to users of foreign trade statistics (changes in type of shipments covered by the current statistics, unusual shipments, problems of valuation, classification, etc.).

A Catalog of Monthly Foreign Trade Statistical Publications listing reports available on a free and paid basis and describing unduplicated information available for reference purposes is available free upon request to the Bureau of the Census.

IMPORT STATISTICS
WILLIAM C. GEORGE

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, metals, such as copper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse withdrawwls for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Subgroup descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete subgroup descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a subgroup classification or country name from this report indicates no transactions for that subgroup or country.

Price: Annual subscription (including annual and monthly issues).....$1.25
Monthly and annual issues, each.....0.10

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, Washington 25, D.C.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information useful to users of foreign trade statistics (changes in type of shipments covered by the current statistics, unusual shipments, problems of valuation, classification, etc.).

A Catalog of Monthly Foreign Trade Statistical Publications listing reports available on a free and paid basis and describing unduplicated information available for reference purposes is available free upon request to the Bureau of the Census.

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, metals, such as copper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse withdrawwls for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Subgroup descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete subgroup descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a subgroup classification or country name from this report indicates no transactions for that subgroup or country.

Price: Annual subscription (including annual and monthly issues).....$1.25
Monthly and annual issues, each.....0.10

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, Washington 25, D.C.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information useful to users of foreign trade statistics (changes in type of shipments covered by the current statistics, unusual shipments, problems of valuation, classification, etc.).

A Catalog of Monthly Foreign Trade Statistical Publications listing reports available on a free and paid basis and describing unduplicated information available for reference purposes is available free upon request to

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, metals, such as copper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse withdrawwls for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Subgroup descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete subgroup descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a subgroup classification or country name from this report indicates no transactions for that subgroup or country.

Price: Annual subscription (including annual and monthly issues).....$1.25
Monthly and annual issues, each.....0.10

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, Washington 25, D.C.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information useful to users of foreign trade statistics (changes in type of shipments covered by the current statistics, unusual shipments, problems of valuation, classification, etc.).

A Catalog of Monthly Foreign Trade Statistical Publications listing reports available on a free and paid basis and describing unduplicated information available for reference purposes is available free upon request to

ROBERT Y. PHILLIPS
Executive Assistant to the Director

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, metals, such as copper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse withdrawwls for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Subgroup descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete subgroup descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a subgroup classification or country name from this report indicates no transactions for that subgroup or country.

Price: Annual subscription (including annual and monthly issues).....$1.25
Monthly and annual issues, each.....0.10

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, Washington 25, D.C.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information useful to users of foreign trade statistics (changes in type of shipments covered by the current statistics, unusual shipments, problems of valuation, classification, etc.).

A Catalog of Monthly Foreign Trade Statistical Publications listing reports available on a free and paid basis and describing unduplicated information available for reference purposes is available free upon request to the Bureau of the Census.

WASHINGTON 25, D. C.

REPORT NO.FT 120

UNITED STATES IMPORTS FOR CONSUMPTION OF MERCHANDISE

Country of Origin by Subgroup

OCTOBER 1948

DECEMBER 1948

REPORT No. FT 120

Bureau of the Census

J. C. Capt, Director

A. ROSS ECKLER
Assistant Director

HOWARD C. GRIEVES
Assistant Director

MORRIS H. HANSEN
Statistical Assistant to the Director

ROBERT Y. PHILLIPS
Executive Assistant to the Director

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, metals, such as copper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse withdrawwls for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Subgroup descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete subgroup descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a subgroup classification or country name from this report indicates no transactions for that subgroup or country.

Price: Annual subscription (including annual and monthly issues).....$1.25
Monthly and annual issues, each.....0.10

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, Washington 25, D.C.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information useful to users of foreign trade statistics (changes in type of shipments covered by the current statistics, unusual shipments, problems of valuation, classification, etc.).

A Catalog of Monthly Foreign Trade Statistical Publications listing reports available on a free and paid basis and describing unduplicated information available for reference purposes is available free upon request to the Bureau of the Census.

IMPORT STATISTICS

WILLIAM C. GEORGE

REPORT No. FT 120

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse withdrawals for consumption:

(1) Commodities withdrawn from bonded storage warehouses for consumption.

(2) For statistical purposes, metals, such as copper, lead, and zinc, withdrawn from bonded smelting and refining warehouses for consumption or for exportation, and commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are included with warehouse withdrawals for consumption.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Subgroup descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete subgroup descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a subgroup classification or country name from this report indicates no transactions for that subgroup or country.

Price: Annual subscription (including annual and monthly issues)..... $1.25
Monthly and annual issues, each..... 0.10

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, Washington 25, D. C.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information useful to users of foreign trade statistics (changes in type of shipments covered by the current statistics, unusual shipments, problems of valuation, classification, etc.).

A Catalog of Monthly Foreign Trade Statistical Publications listing reports available on a free and paid basis and describing unduplicated information available for reference purposes is available free upon request to the Bureau of the Census.
